EXPERIENCE

Sofware Engineer
MILSOFT Software Technologies   📅 Mar 2021 - Present

- Participated in development, maintenance and testing activities of Tactical Data Link processor application using C++ with DDS based publish-subscribe communication.
- Worked on modernization of legacy systems, including upgrading work tools, language standards and architectural design changes.
- Supported applications on Linux, Windows and Solaris operating systems.

Software Intern
HAVELSAN A.Ş.   📅 July 2019 – August 2019

- Supported development and testing activities of 5G techology standard project, primarily using Java.
- Worked with technologies and frameworks such as Spring Boot, Apache Ignite, JUnit, Docker, and Agile methodology.

EDUCATION

Bachelor of Science – BS, Computer Science
🎓 **Ankara University**   📅 2016 – 2021

Electives: Complex Networks, Digital Image Processing, Cloud Computing, Information Systems, Information Security.

PROJECTS

❶ Child Tracker – **Senior Year End Project**

- An Android application that helps parents to track their children.
- Built using Java, NodeJS, PostgreSQL, Arduino and Microsoft Azure.

CERTIFICATES

📄 **Microsoft Azure Fundamentals** 💱
Microsoft

SKILLS

Software Engineering

`OOP` `Design Patterns` `Version Control`
`Agile Methodology` `Web Development`
`Cloud Computing` `RDBMS`

Programming Languages

Advanced: `C++` `Java`

Intermediate: `JS` `Kotlin` `Python` `SQL`
`HTML/CSS` `Go`

Libraries & Frameworks

`Express` `ReactJS` `Maven` `Modern C++`
`Cmake`

Tools & Platforms

`Linux` `Windows` `Visual Studio` `IntelliJ Idea`
`Git` `Jira` `Microsoft Azure` `AWS` `Docker`
